

PERLA 15

SUBLIME

PRODUCT DESCRIPTION

This is a specific polishing compound for lacquered surfaces, which can effectively remove P1500-2000 sanding marks as well as medium-light oxidation, scratches and dullness. **PERLA 15** has been developed for offering a “one step” product, which combines an excellent cutting action to a sublime shiny finishing, thus allowing a shorter and faster polishing process. Widely used also for polishing carbon parts when a quick and clean “spot repair” is needed.

PHYSICAL PROPERTIES

Colour: White
 Physical form: Liquid-creamy
 Odour: Light and pleasant
 Density: 1,030 g/ml
 Flammability: Not flammable
 Type of surface: Painted parts, lacquered carbon

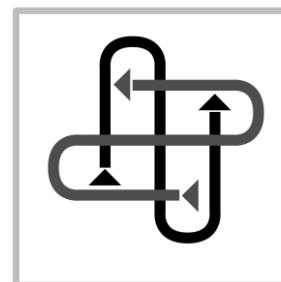

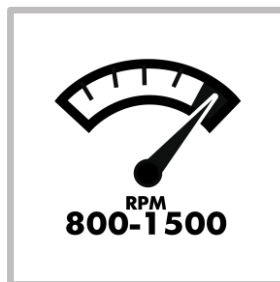

HOW TO USE

Shake before use, then apply by variable speed polisher, selecting either a medium-hard orange foam pad for a more delicate and softer action, or an anti-scratch wool pad **SL3** for a more aggressive and quicker one. Pour a small quantity of compound on the polisher-pad. Let the polisher turn at low revolutions, speeding them up (800-1500 RPM) while spreading the paste with crossed movements. Pay attention at not overheating the surface. If necessary, please repeat the application more times. Eventually, wipe the surface with a clean cloth.
